Discover the Anatomy of **Te-Ka Engineering**

Te-Ka Engineering offers reliable solutions in the information technology, defense, energy and electrical & electronics sectors with its years of experience.

As a preferred business partner of large corporate companies, we stand out with our disciplined approach to work and innovative perspective.

Drawing strength from our experience, we continue to provide our customers with technologies that meet not only today's needs but also those of tomorrow.

Experience

10⁺

Years of Experience
Endless Trust.

Discover Te-Ka's Unique Services!

CCTV Camera Solutions

Smart camera and surveillance solutions for city security.

Network Systems

Advanced communication infrastructure services.

Server Solutions

Powerful, reliable, and scalable server solutions.

Fiber Optic Systems

High-speed data transmission and robust infrastructure services.

Elektronic Warfare Systems

Advanced defense technologies for national security.

Solar Energy Systems

Clean, economical, and sustainable energy solutions.

Low Voltage Electrical Systems

Safe, reliable, and efficient electrical infrastructure solutions.

Medium Voltage Electrical Systems

Reliable power solutions for high-power applications.

For detailed information, please refer to the following pages.

CCTV Camera Solutions

CCTV Camera systems play a critical role in preventing crime, quickly resolving incidents, and enhancing overall security by enabling 24/7 monitoring of cities.

As Te-Ka Engineering, we offer professional solutions with high-resolution camera systems, intelligent image processing software, license plate recognition technologies, and central management infrastructure. Thanks to the systems we install, institutions and city administrations can monitor security in real time and respond quickly to incidents.

24/7 Security

Rapid Response

Smart Analysis

Long-Term Solution

Network Systems

A robust and reliable network infrastructure is the most critical need for organizations of all sizes. Network systems ensure uninterrupted communication, secure data transfer, and more efficient execution of business processes.

Te-Ka Engineering builds the digital backbone of organizations with customized network design, wired/wireless solutions, firewalls, switch/router installations, and manageable network solutions.

✓ Uninterrupted Connection

✓ Secure Data Transmission

✓ Scalable Architecture

✓ Professional Support

Server Systems

Server systems are critical for businesses to securely store their data, run their applications without interruption, and ensure business continuity.

Te-Ka Engineering offers solutions tailored to business needs, including physical and virtual server solutions, data backup infrastructures, high-performance storage solutions, and secure hosting services.

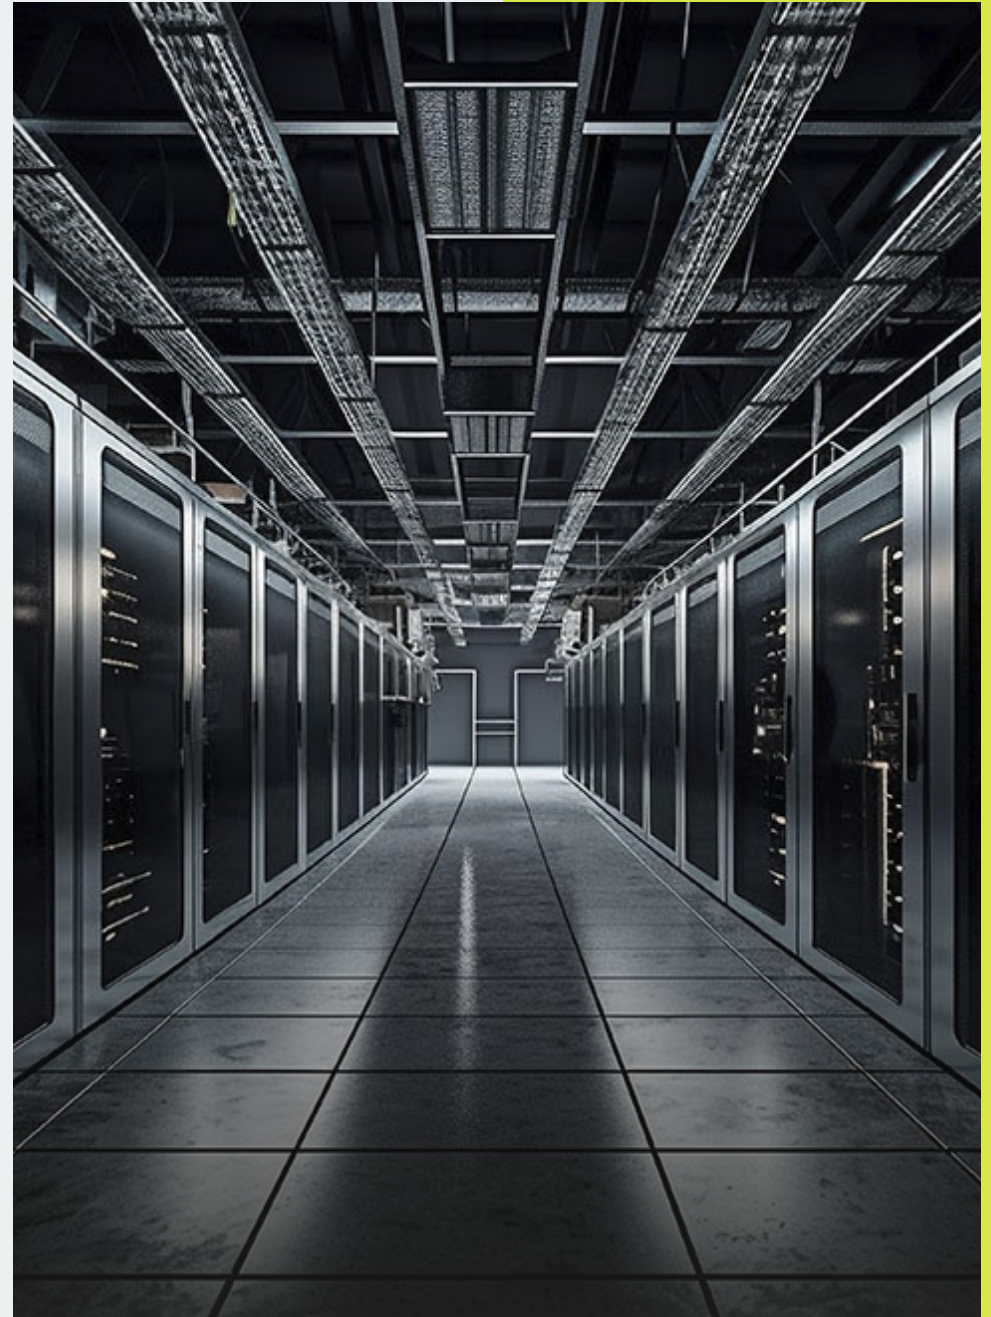

Our systems are configured with both high performance and maximum security in mind.

✓ High Performance

✓ Data Security

✓ Backup Infrastructure

✓ Flexible Use

Fiber Optic Systems

Today's fastest and most reliable communication infrastructure is fiber optic technology. Fiber optic systems offer high-speed data transfer, low latency, and uninterrupted communication over long distances.

Te-Ka Engineering provides end-to-end fiber optic solutions, from infrastructure installation to testing processes. It meets the internet, intranet, data center, and telecommunications needs of organizations at the highest standards.

Fast Data Transmission

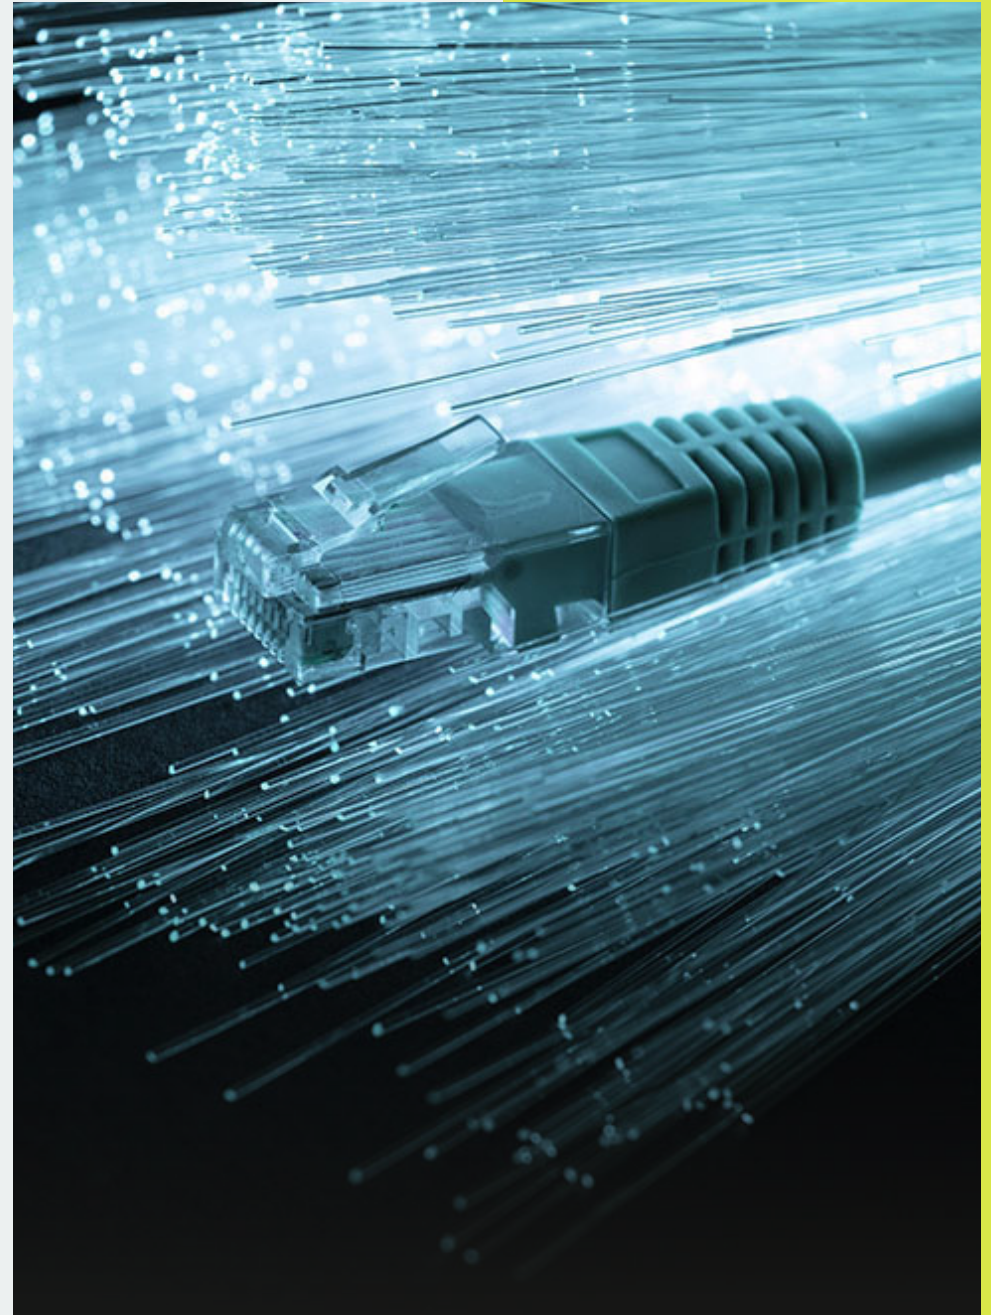

Uninterrupted Connection

Long-Distance Performance

Future-Ready Infrastructure

Electronic Warfare Systems

One of the most critical areas in defense technologies is electronic warfare systems. These systems aim to gain superiority over the electromagnetic spectrum and neutralize enemy communications and radars.

Te-Ka Engineering offers advanced solutions for signal jamming, radar jamming, electronic intelligence gathering, and the protection of friendly forces. With our expert engineers and robust technical infrastructure, we deliver projects that provide strategic advantages in the defense sector.

Strategic Security

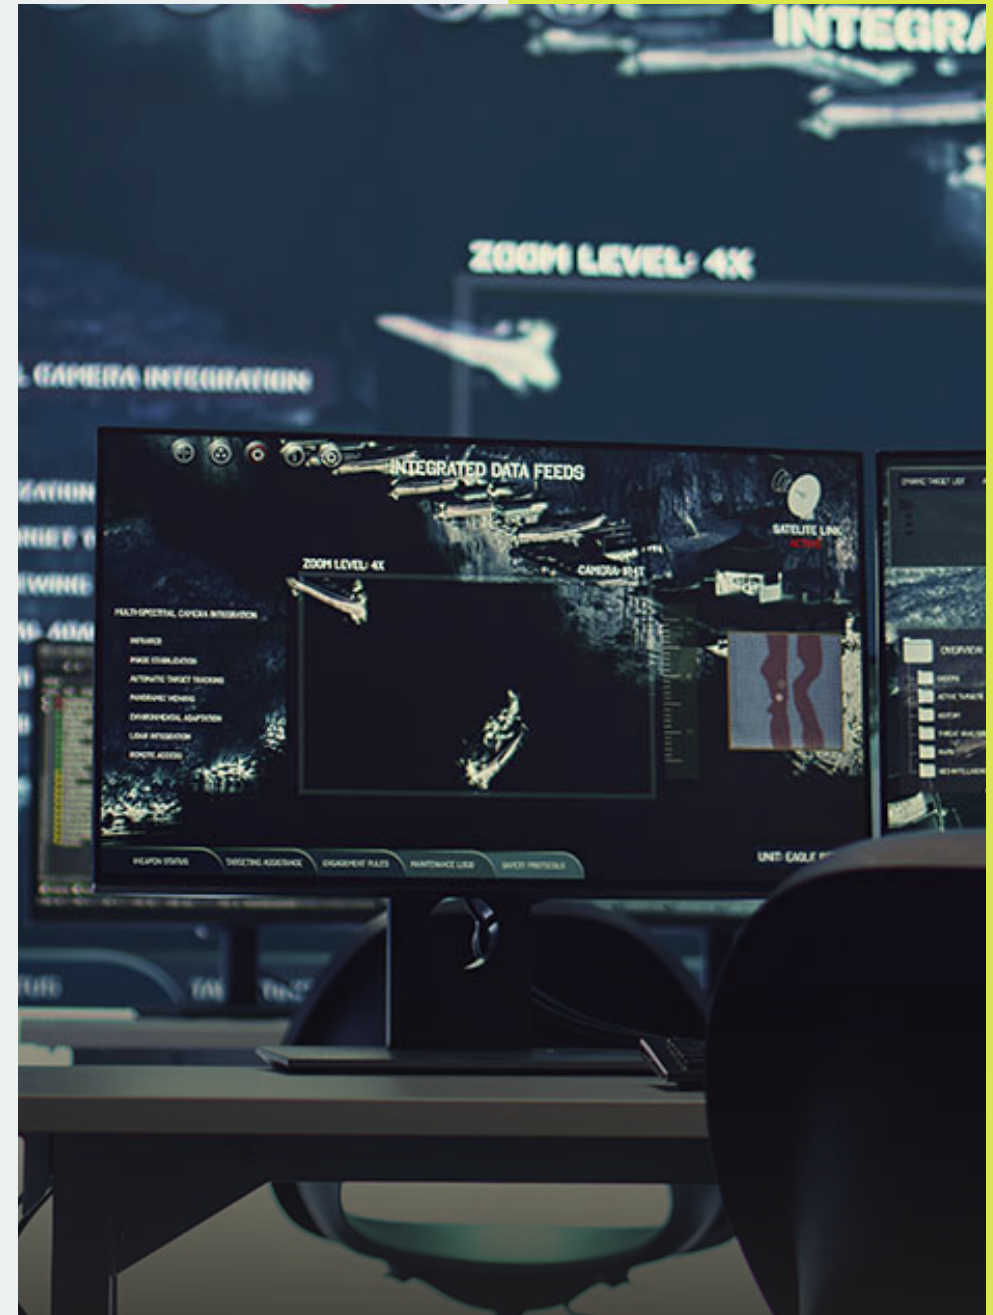

High Technology

Professional Integration

Defense-Focused Solution

Solar Energy Systems

In today's world where energy costs are rising and sustainability is gaining importance, solar energy systems stand out as both an environmentally friendly and economical solution.

Te-Ka Engineering offers professional solutions for the installation of rooftop and ground-mounted solar power plants. We provide end-to-end services, from panels to inverters, storage systems to maintenance services.

Renewable Energy

Low Cost

Environmentally Friendly Solution

Long-Lasting System

Low Voltage Electrical Systems

For industrial facilities, low voltage electrical systems form a critical infrastructure for safe and efficient power distribution.

Te-Ka Engineering provides professional solutions for LV infrastructures, including electrical panels, cabling, busbar applications, grounding and protection systems.

This enables businesses to maintain a safe, organized and reliable electrical infrastructure for long-term operation.

✓ Electrical Panel Systems

✓ Cabling and Power Distribution

✓ Grounding Systems

✓ Busbar Applications

Medium Voltage Electrical Systems

For facilities with high power requirements, medium voltage electrical systems provide safe and continuous energy transmission to the facility.

Te-Ka Engineering delivers professional solutions in transformer installation, MV switchgear systems, power transmission lines and internal power distribution.

This provides businesses with a reliable and sustainable power infrastructure tailored to their energy requirements.

✓ Transformer Installation

✓ MV Switchgear Systems

✓ Power Transmission Lines

✓ Industrial Power Distribution
